## MPH HARMONY

### PLEATED INSECT SCREEN SYSTEM

- Pleated insect screen system MPH is a solution primarily designed with the aim of providing space savings. This product is ideal for installation on the patio doors and balcony niches, where the width reaches up to 4m.
- The use of special pleated mesh, which when closing arranges in a zigzag pattern and hides in the side profile is a characteristic feature of this product. Thus, the insect screen takes up little space allowing optimal use of the surface. Importantly, it does not impair, in any way, the functionality of the door and does not obstruct visibility to the outside.
- An advantage of this solution offered by Aluprof is the possibility of separate tension control of each of the ropes controlling the insect screen, which guarantees its stable arrangement.
- The MPH system is characterized by an extremely smooth movement, which makes its use very simple and does not require much effort. In addition, the construction of the insect screen allows to stop it in any position. The advantage of this solution is also the low threshold that does not hinder the passage of users.
- The insect screen is made of extruded aluminium, which makes it durable and resistant to weather conditions, and in addition it can be varnished in any RAL colour.
- The pleated insect screen Harmony has been designed to smoothly work with the Aluprof roller shutter systems with the guide channel PPMO 53.

# MPH HARMONY / PLEATED INSECT SCREEN SYSTEM

The insect screen construction is made of extruded aluminium, which guarantees its durability and strength

The possibility of separate tension control of each of the ropes controlling the insect screen, which guarantees its stable arrangement

The pleated mesh when closing arranges in a zigzag pattern and hides in the side profile, which guarantees considerable space savings

The possibility of achieving large widths up to 4 m

The use of low threshold allows free passage of users

## PROFILES COLOUR RANGE

The colours don't pattern faithfully upon the real colours. The availability of colours depends on the profiles' type.
